GETTING STARTED

The first week in Whiteout Survival sets the trajectory for everything that follows. These are the decisions that matter most when you are starting out.

Day 1	Complete the tutorial fully — every reward matters. Begin your first Construction upgrade immediately after. Never leave the queue empty.
Day 2	Focus on upgrading the Furnace. It is the single most important building in the game. Every other upgrade tier-gates behind it. Join an active Alliance today — the benefits are immediate.
Day 3	Claim your free daily hero shards. Begin Exploration stages — go as far as you can each day. Exploration is your primary source of early resources and hero shards.
Day 4	Check the Event Calendar and identify which events reward Construction or Research completions. Start saving speed-ups for active event windows rather than using them freely.
Day 5	Begin Research in the Development tree. Tech bonuses compound over the entire game — the earlier you start the further ahead you get.
Day 6	Participate in your first Alliance events. Use Alliance Help on every ally request — it costs nothing and builds goodwill. Contribute to Alliance Tech daily.
Day 7	Review your hero roster. Identify your primary F2P damage hero and begin concentrating upgrade resources on them. Do not spread thin.

RULE 1 — NEVER EMPTY YOUR QUEUES

Never leave your Construction queue empty. Every minute without an active upgrade is progression you cannot get back. The same applies to Research and Troop Training.

WHO TO FOCUS ON

Heroes are the most impactful upgrades in the game. Concentrating resources on the right heroes early separates fast progressors from slow ones. Below are the priority heroes for new players — with clear flags on who is accessible to F2P players and who requires spending.

Hero	Gen	Type	Tier	F2P?	Notes
Jeronimo	1	Infantry	S	NO	Best all-round Gen 1 hero. Stays relevant through Gen 4+. PAY TO WIN — only via direct
Molly	1	Lancer	S	YES	Best F2P Gen 1 hero. Free via 7-day login. Versatile, reliable, stays relevant across multip
Alonso	2	Infantry	S	YES	Best F2P Gen 2 hero. Use Gold (General Mythic) Shards on him — aim for 4 stars. Do NO
Flint	2	Infantry	A	YES	Win him via Lucky Wheel during Hall of Chiefs. Wheel spins ONLY — never spend Gold S
Mia	3	Lancer	A	YES	Strong Gen 3 hero. Good long-term investment. Exclusive Gear is worth it when she becom
Philly	2	Lancer	A	YES	Best healer. Won via Hall of Chiefs Season rewards. Essential for Exploration and sustain
Zinman	1	Marksman	B	YES	Growth hero only — speeds construction. No PvP value. Do not use in combat lineups.
Natalia	1	Infantry	B	NO	PAY TO WIN — only via first purchase pack. Strong early attacker but not accessible to F2

■ PAY TO WIN — NOT ACCESSIBLE TO F2P PLAYERS

Jeronimo and Natalia are Pay to Win heroes — they cannot be obtained by free-to-play players. Jeronimo is purchased directly. Natalia comes only from the first purchase pack. Both are excellent heroes if you have them, but F2P players should plan their progression around Molly, Alonso, Flint (wheel), and Mia — not around heroes they cannot access.

HERO RULE — GOLD SHARDS GO ON ALONSO, NOT FLINT

Save your Gold (General Mythic) Shards for Alonso in Gen 2 — aim for 4 stars. Flint is a Lucky Wheel hero and should be maxed entirely through wheel spins during Hall of Chiefs. Spending Gold Shards on Flint is one of the most common F2P mistakes.

Blue gathering heroes: Do invest Skill Manuals in your blue (Epic) gathering heroes' gathering bonus skills. This directly increases your daily resource income and is correct F2P play. The rule about not investing in blue heroes applies to **combat** blue heroes only.

EVERY DAY WITHOUT FAIL

Consistency beats intensity in Whiteout Survival. Fifteen focused minutes every day outperforms two hours once a week. Here is the exact routine.

1	Collect resources	Collect all building production. Check Coal levels — top up if needed.
2	Construction	Start a new upgrade immediately. Never leave the queue empty.
3	Research	Queue next tech. Apply speed-ups only if an event is active.
4	Troop training	Check training queues — always be training. Never idle.
5	Gathering	Send heroes on gathering missions if they are idle.
6	Alliance Tech	Make 3–5 daily contributions. Earns Gems and Alliance Tokens.
7	Alliance Help	Use Help on all ally requests. Costs nothing, builds goodwill.
8	Events	Check the Event Calendar. Complete all available daily tasks.
9	World map	Scout for threats nearby. Shield up if you cannot actively monitor.
10	Alliance chat	Check for event coordination or rally announcements from leadership.

CORE PRINCIPLES

SPEED-UP DISCIPLINE

Only use speed-ups during active Construction or Research events. A speed-up used during an event becomes one speed-up plus event rewards. Used outside an event it is just one speed-up. The difference compounds dramatically over months.

ALLIANCE MATTERS MORE THAN ANYTHING ELSE

Your alliance is the most important contextual factor in your game. Being in a top 5 alliance on your server accelerates your progression faster than almost any other decision. If yours is inactive or uncoordinated, move.

SHIELD BEFORE YOU LOG OFF

If your troops are unshielded and you cannot actively monitor the game, you risk losing troops that take weeks to rebuild. A Shield costs almost nothing. Use it whenever you are going to be away for more than a few hours with significant unprotected resources or troops.

THE COMPLETE GUIDE

+ Complete hero tier lists Gen 1–Gen 6	+ Advanced endgame systems and Chief Gear
+ Full Foundry Battle phase walkthrough	+ F2P gem spending guide — every free gem
+ State vs State day-by-day prep guide	+ Complete daily routine checklist (expanded)
+ Bear Hunt, Crazy Joe and Frostfire Mine	+ Expert system and specialisation paths
+ Alliance mastery — evaluating and leading	+ Generation system and long-term planning

Get the Complete 9-Chapter Guide

One-time purchase. Instant download. Everything in this guide plus 8 more chapters covering every major system — heroes by generation, Foundry Battle, SvS, endgame F2P strategy and more.
